

Living Longer & Younger with Human Growth Hormone

Aging effects once thought to be irreversible can now be reversed!

“Medical studies show Human Growth Hormone reverses some aging effects”

The Palm Springs Life Extension Institute makes living longer and younger a reality. Using Human Growth Hormone (HGH) replacement therapy as documented by the New England Journal of Medicine and subsequent medical studies -- many effects of aging can now be reversed, bringing about dramatic rejuvenating results in older people:

- *Increased lean bone mass (reversal of osteoporosis).*
- *Increased lean muscle.*
- *Decreased body fat.*
- ***Firmer** skin tone and texture.*
- *improved strength and endurance.*
- *Increased immune function and healing capacity.*
- *Improved cardiac function.*

Human Growth Hormone is a natural substance made by the human body. As a person ages, the HGH level drops considerably. By replacing HGH, many age-related degenerative conditions **Can be significantly** improved and reversed.

Take control of the aging process -

*Look Younger,
Feel Younger,
and Stay Younger.*

HGH is FDA approved
